„HardRock“ - new generation of moulds

- thin-walled hard polymer mould
- low costs

Precise prototyping with selected
surfaces

Technical precision with a natural look

TimberCast Wet-Cast products are fully developed wood products with handpicked and hand-worked down to the smallest detail, which show the full charm of wood and are made with technical precision.

Feel good with wood

As a customer, you have no prototyping or model building costs.
We are constantly expanding the TimberCast product range! Visit us again!

Fast mould delivery without development costs

Simply include the TimberCast series in your portfolio!
Or take the products as an idea and basis for your own product development!

Fast product development based on TimberCast

We have specialized in diverse and attractive products with wooden surfaces.
Through a first-class cooperation with various woodworkers for many years, we have a huge selection of exclusive wood surfaces available.
20 years of experience in the wet-cast industry have trained us in what details are important for the concrete-wood product!
